Exp no: 12 Case study on Railway Reservation System - Negative Test cases.

Objective: To identify and analyze the requirement of a Railway Reservation System and to write negative test scenario and test cases for the application.

Items to be selected	Features	Approach	Test Data	Test Environment	Training needed	Risk	Test case scenario	pass / fail
User Registration	Email validation	Manual	Invalid Email(no @)	Laptop, phone	No	No	→ Verify system displays an error message when an invalid email format is entered	pass
User Login	Security	Manual	Wrong password	Laptop, phone	No	No	→ Verify that the system denis Success and shows "Invalid Credentials" for an incorrect password.	pass
Train Search	Route Login	Manual	Same Station	Laptop, phone	No	No	→ Verify that the system displays an error if the 'source' and 'destination' stations are the same	pass
passenger info	Age constraint	Manual	Negative age	Laptop				

passenger info	Age constraint	Manual	Negative age (-10)	Laptop, phone	NO	NO	→verify that the System displays a validation error when a negative member or zero is entered in the age field
Name field	Character Limit	Manual	Number/ symbol	Laptop, phone	NO	NO	→verify that the system rejects passenger names that contains character or special character
Seat Booking	Booking Limit	Manual	10 passeng -er	Laptop, phone	NO	NO	→verify that the System reject S passen -ger names that contains characters or passenger per ticket.
